

MaxxSeal

Liquid Road Base Stabilizer & Sealant

Extreme Conditions Call for Extreme Measures!

**MaxxSeal Is Your #1 Solution For Eliminating
Country Road Dust & Preventing Road Deterioration!**

Proven Performance In:

- Road Base Stabilization
- Dust Control
- Military Convoy & Tank Trails
- Water Retention Basins
- Sealing Old Worn Asphalt Surfaces

MaxxSeal

Liquid Road Base Stabilizer & Sealant

NO. 1 MaxxSeal 100 "Vinyl Acrylic Liquid Stabilizer"

MaxxSeal 100 is an all-purpose liquid soil stabilizer and additive that binds and transforms the base into a solid, yet flexible mass that resists fracturing. It prevents base failure, dust pollution and soil erosion, and it increases soil strength and reduces its permeability.

MaxxSeal 100 is a vinyl acrylic copolymer-based emulsion that requires water dilution. **MaxxSeal 100** advantages are:

- **Non-petroleum-based**
- **Eco-friendly**
- **Evaporating only water during the curing process**
- **Emitting no volatile organic compounds (VOCs)**
- **Does not contain solvents**
- **Does not cause damage to roads or vehicles**
- **Easily applied**
- **Requiring no special equipment or handling procedures.**

Test results show that **MaxxSeal 100's** strength is comparable to that of cement stabilization. Once the product has cured it develops into a solid mass which will withstand traffic without unraveling.

NO. 2 MaxxSeal 200 "Styrene Acrylic Liquid Stabilizer"

Like the MaxxSeal 100, **MaxxSeal 200** is also an all purpose liquid stabilizer. However since it is a styrene acrylic product, it has superior performance for strength and especially impermeability. This makes it an ideal product for use in heavy haul roads, landfill liners, caps and pond liners.

A special **ICS-Soil Seal** program made for Haul Roads is dedicated to controlling dust on roads with extremely heavy traffic. This program will show permanent/guaranteed results when MaxxSeal 200 is applied using the **ICS-Soil Seal** method of installation and maintenance. The success of this program with MaxxSeal 200 has been proven by many of our more notable partners in the industry.

MaxxSeal Lab Proven Results!

Unlike many of our competitors, MaxxSeal has proven results showing superior strength results using the Marshall Test method on the Humboldt Test Equipment.
